North Carolina State University: BS Industrial and Systems Engineering (2016)

WORK EXPERIENCE

Quality Assurance Engineer
Cognizant (Ally Financial) | *February 2018 – Present* | Charlotte, NC
Member of an Agile scrum team as a functional Quality Assurance tester for the web account opening experience. Functional and integration testing for sprint stories, enhancements, and releases. In-sprint automation for sprint stories and regression suites using Java selenium and Cucumber. Led regression efforts for large API refactoring efforts including coordination with offshore resources.

- Automation efforts including Java selenium/cucumber scripting, setting up Java Selenium/Cucumber framework, Git Flow, and repository.
- Test execution, scripting, and planning for core functionality and integration for all scrum team's stories, defects, and enhancements.
- Providing valuable feedback to the Business owners, and entire Agile team, from a tester's point of view.

Cognizant (BB&T) | *September 2017 – January 2018* | Raleigh, NC
Functional Tester(SIT) for mortgage web applications in an Agile development environment. All the applications integration and functional requirements were tested for each sprint. The project included comprehensive testing for mobile and desktop applications.

- Defect detection, reporting, and management working along side development teams to triage bugs
- Creation and design of test cases and their execution in a fast-past Agile development team
- Communication and coordination with project owner(s) and business leads to refine and plan design requirements

Quality Assurance Engineer
Cognizant (Ally Financial) **l** *May 2016 – July 2017* **|** Charlotte, NC
Defect Manager and Quality Assurance Engineer for the desktop/mobile web application teams responsible for the facilitation of daily/weekly triage efforts for Ally Bank's largest portfolio of software products. Role included testing for mobile and desktop applications.

- Facilitated and coordinated defect remediation efforts between technology leadership and key business stakeholders within guidelines of 100% traceability
